Oct 26th Oyster Bowl at Darling Stadium

The Apprentice School vs. Salisbury University

HAPPY HALLOWEEN

The First Annual Oyster Bowl Pep Rally

Friday October 25th at The Apprentice School gym. The competition will feature a diverse selection of foods for you to sample as well as fun games and prizes. Admission will be \$5 at the gate and all proceeds will be donated to The Children of the Shiners Hospital.

Well folks if you missed the other picture days, or maybe the horror of seeing your picture in the 2000 yearbook has prompted you to update. This is your last chance! Pictures will be taken for the 2003 yearbook! Nov. 19th & Dec. 9th from 3:30-6:00.

Rock & Bowl

Nov 1st 10pm - 1am

\$3 per person

\$15 per lane

OTHER UPCOMING EVENTS

ASSA Fall Golf & Trades Day Nov 2nd

Alumni Oyster Roast Nov. 16th

Apprentice Wrestling

It's just about time to kick off a new season of Apprentice Wrestling. Fourth year head coach Mike Clayton is already in gear, but managed to take some time to give us his thoughts about the upcoming season. Along with Mr. Clayton, this year's coaching squad also includes Sinque Holmes, André Kemp and Matt Butler. The Season brings a great group of returning wrestlers as well. Among these are:

125 lb	<i>Mikey Valdeperas</i>	<i>4th at NCWA Nationals last year's</i>	
141	<i>Jon Peters</i>	<i>1st at NCWA Nationals last year</i>	
149	<i>Ron Vecchione</i>	<i>2X NCWA Qualifier and All-American in 2001</i>	
157	<i>Jessie Jennings</i>	<i>Qualified for NCWA Nationals last year at 184</i>	
165	<i>Jovon Butler</i>	<i>Qualified for NCWA Nationals last year at 165</i>	
174	<i>Jake Johnston</i>	<i>Qualified for NCWA Nationals last year at 174</i>	
197	<i>Miles Hamrick</i>	<i>Qualified for NCWA Nationals last year at 197</i>	
197	<i>Mike Hansen</i>	<i>Qualified for NCWA Nationals in 00, 01, and 02. All-American in 00.</i>	

This year Mike Hansen will be the senior team captain. Mike has a chance to be our school's first 4 time NCWA National Qualifier. He is an experienced leader and will wrestle at 197 lbs down from 235 last year. Sophomore Jovon Butler will also be a team captain again this season. Jovon is very mature and responsible and helps guide the younger talent along the right path. Expect to see Jon Peters, Mikey Valdeperas as well as a few other returning lettermen and freshmen also play important leadership roles. Coach Clayton had this to say when asked about his view of the season: "Although we have many returning wrestlers, they are young and we will have a lot of new faces in the crowd.

Our team size should be up from last year and that will help us develop quicker and force top wrestlers to train harder to keep their spot on the team. It's too early to predict how good we could be. We'll need to work hard and stay focused to stand a chance at winning nationals this year... It should be an exciting season and I really have an optimistic outlook on this season. All the talent in the world isn't worth much unless they are willing to pay the price of success. I'm looking to see who will be willing to pay the price."

Clayton's plans for improvement involve expanding the recruiting base and toughening up the schedule. He feels that focusing on these aspects will help to bring the program to an elite level. Matt Butler has been instrumental in developing a database to cover recruits in various states that, until this past season, have yet be drawn from. He has also added some morning workouts, tougher off-season training programs and increased focus on data analysis for team stats and fitness tests. Clayton said "I've still got a long way to go as a coach to help these young people develop their skills but we are striving for long-term improvement of each athlete and for the program as a whole." Coach Clayton's overall goal is to develop our team in such a manner as to be competitive against any opponent in the nation. He is continuously looking for young people who will take a leadership role, not only on the team, but also in the classroom and on the job.

Their first event will be the team inter-squad meet on October 26th from 8:30 to 9:30 am at the gym. The Team will also hold a golf event to introduce supporters to the team and hopefully to raise a little money to help fund special events. That golf tourney will be on November 2nd. If anyone would like more information, you can call Coach Clayton at 757.869.8798. If you get a chance check out Claytons one stop wrestling web site at <http://www.claywolfsports.com>.

The Builder Bulletin wishes everyone on the 2002-2003 team the best of luck!

Remember This Guy?

His name is Jeff Behrens and he is a Free Safety for The Builders Football Team. This is Jeff's 2nd year with the builders and he is currently a 4th term Apprentice. Jeff found his way to Virginia from New Jersey to play football for The Apprentice School. While getting a hair cut before the first game of this season, his fellow teammate Chris Bryans suggested Shaving an Apprentice School "A" on the side of his head. And the rest is history!

His attitude about the team is very positive and he feels it has improved, with a good coach and strong defense. Jeff's Teammates had this to say: He gives all he's got every play. The fumble he recovered during the opening game of the season is evidence of this... Jeff feels that The A-School has been a positive influence on him, teaching him the goals and values needed to succeed in life. His classmates agree, saying he has changed quite a bit since first arriving in Newport News.

Read-a-Book Reviews

LIGHTNING

By: DEAN KOONTZ

Whenever Laura Shane finds herself in trouble she suddenly sees a blinding flash of lightning and a tall blonde headed man appears out of thin air and rescues her time and time again all through her life. Who is this stranger seemingly walking out of a flash of lightning? Is he an ark angel sent to watch over Laura for some future destiny or is he a malevolent evil entity playing Laura for her eternal soul? Laura Shane is in for the rollercoaster ride of her life and she does not know why.

Lightning explodes with the colorfully rich vocabulary used by Mr. Koontz and the scientific paradox of time and space aspects. This is a very fast paced novel and I had a hard time putting this book down until I finished the last page.

If you are interested in all the theories of time travel and you have always dreamed of a vacation to a past, present, or future year of history, this is the book for you. Dean Koontz is a true master of the written page.

Shaun's Movie Corner

Signs

A dramatic movie starring Mel Gibson in which crop circles begin appearing in the fields outside his house. This movie keeps your eyes glued to the screen with great use of suspense and occasional laughter. This movie is good for everyone; it may however be too scary for younger viewers. There is only one curse word, and the violence is kept to a bare minimum. Basically what happens is that the aliens come down to Earth. Telling you what they want would give away the movie, but trust me the movie is worth seeing.

Undisputed

This film is about the heavyweight boxing champ (Ving Rhames) who goes to prison for rape. While in prison he has to square off with the prisons current boxing champ (Wesley Snipes). For some unexplainable reason I enjoyed this movie. There really aren't any morals in this movie, nor are there any thought worthy points. It's just something about movies with boxing that reminds me of the good old Rocky days with Sylvester Stallone. It is worth watching, but you might want to rent it instead.

Austin Powers "Gold Member"

A comedy starring Mike Myers that is basically the same thing as every other Austin Powers movie, so stupid you have to laugh. This movie contains all of the Austin Powers characters from the previous films as well as one new one. The hilarious Mini me is back and is an even bigger part of the action. The movie is all about Dr. Evil going back in time to kidnap Austin's dad, and Austin's struggle to find him again. If you like the humor of the first two, then this is the movie for you.

October Math Challenge

A deli owner has a large round piece of cheese, uniform in length. He cuts a segment (Hint: use geometry definition of segment) from the cheese equal to one fourth its circumference. If the segment weighs 2 pounds, what is the weight of the original piece of cheese?

The solution must be accompanied by reasoning/work. A time submitted in the upper left corner is needed to determine a winner. Place answers in Mr. Jones in-box in the office.

September Math Challenge Answer

1. From Scale #1, you can figure out that $Z=2X$, because the Z on the left side has been replaced by 2 Xs on the right side.
2. Next, say that $X=2$ and $Z=4$. That would put a 12 on the right side of Scale #2, which means that Y must equal 3 to make the left side of Scale #2 the same as the right side ($4+3=12$).
3. Now you know that the left side of Scale #3= 10 ($3+3+4=10$). Since $X=2$, the right side of Scale #3 must have 5 Xs in order to equal 10 ($5*2=10$). By the way, it doesn't matter which numbers you use. Just so you make sure that $Z=2X$, you'll always come out with 5 Xs on the right side of Scale #3.
